THE GHAN

## OUTBACK TO OCEAN

### DAY 5 – THURSDAY, 25 APRIL 2024, KING GEORGE RIVER

The journey up the King George River is nothing short of breathtaking. The 80-metre-high sides of the gorge display varying degrees of weathering of the ancient Warton sandstone. The colours and textures change with the light creating a continually changing vista that is simply stunning. The journey culminates at the King George twin falls, the highest single-drop falls in the whole of the Kimberley. Your Expedition Team will escort you to the foot of the twin falls and explain the stunning geological formations of the canyon. (B,L,D)

### DAY 6 – FRIDAY, 26 APRIL 2024, VANSITTART BAY

Jar Island contains ancient rock art galleries depicting the Gwion Gwion style unique to the Kimberley region. Gwion Gwion art may extend back to over 30,000 years before our time and represents the first wave of seagoing colonisers of the Australian continent. As it is, these are the oldest detailed depiction of human figures in the world. Join your Expedition Team ashore for a short walk, past some fascinating rock formations, to the site of the Gwion Gwion art galleries. (B,L,D)

### DAY 7 – SATURDAY, 27 APRIL 2024, ASHMORE REEF (TECHNICAL STOP)

Located 600 Kilometres north of Broome, on the edge of the continental shelf, Ashmore Reef consists of 3 low-lying tropical islands surrounded by coral reef. The islands have a combined land area of approximately 54 hectares and are a designated important bird area (IBA). Visitation to Ashmore Reef and Islands is strictly controlled and most of the reef is designated as a sanctuary zone where access is prohibited. Our visit to Ashmore Reef is required to ensure we comply with Australian government regulations. Should weather, sea and tide conditions permit, there may be an opportunity for guests to undertake a zodiac tour of the vicinity of West Island. (B,L,D)

### DAY 8 - SUNDAY, 28 APRIL 2024, CAREENING BAY

Careening Bay was named by Lieutenant Phillip Parker King after his ship, HMC Mermaid, was careened there during his third voyage of discovery in 1820. At a high tide, on a warm September afternoon, King ran the leaking Mermaid onto the sands. As the crew worked hard to re-float the vessel, the ship's carpenter carved the name of the vessel

and the year into a conspicuous boab tree. The boab tree is now three metres wide and National Heritage listed. (B,L,D)

### DAY 9 – MONDAY, 29 APRIL 2024, SWIFT BAY

The Bonaparte Archipelago consists of a rugged maze of islands stretching almost 150k Kilometres along Western Australia's coast. Its remote location has ensured it remains a remarkably pristine location to explore and experience. The 'T' shaped bay is composed of heavily fractured sandstone providing an abundance of rock shelters. On the walls of these shelters are examples of Wandjina and Gwion Gwion style rock art. Join your Expedition Team ashore for a guided walk to a number of rock art galleries depicting these unique rock art styles. (B,L,D)

### DAY 10 – TUESDAY, 30 APRIL 2024, HUNTER RIVER

Arguably one of the most scenic parts of the Kimberley coast, Prince Frederick Harbour and the Hunter River are lined with pockets of ancient rainforest, pristine mangroves, and mosaic sandstone cliffs. The sandstone escarpment at the river mouth, known as "Kampamantiya" rises over 200 metres high before giving way to extensive mud banks and mangrove forests home to numerous bird species and the saltwater crocodile. The Expedition Team will share their knowledge as you explore by Zodiac, keeping a lookout for wildlife. You will also have the opportunity to reach the Mitchell Falls by helicopter from Naturalist Island beach. (B,L,D)

### DAY 11 - WEDNESDAY, 01 MAY 2024, COLLIER BAY

Lying to the east of the Buccaneer Archipelago, the ancient landscapes of Collier Bay have been shaped by massive tidal movements, creating a photographer's paradise. With a tidal range exceeding 14 metres, this movement of water creates unique phenomena. Nestled in the centre of the bay is Montgomery Reef, the world's largest inshore reef system. As the tide falls a raging torrent of water cascades off the top of the reef, creating turbulent 'rivers' and mini waterfalls. (B,L,D)

### DAY 12 – THURSDAY, 02 MAY 2024, HORIZONTAL FALLS

At the southern end of the Bay, Talbot Bay is home to the world's only 'Horizontal Falls', described by Sir David Attenborough as "One of the greatest wonders of the natural world." Hidden in the many caves and grottos of
